

ProBalance[®] Canine Wellness Formula

What is ProBalance?

ProBalance Canine Wellness formula is a super concentrated, fully balanced protein, fatty acid, vitamin and mineral supplement. ProBalance Canine provides multiple specialty nutrients that help support a competent immune system, reduces unwanted inflammation, protects against free radical oxidation, assists normal intestinal function, and aids in the nourishment and lubrication of joint cartilage. ProBalance improves pet health, increases activity, helps to push back normal age related diseases, maintains physiological processes in a more youthful state and ultimately, allows dogs to live a longer, healthier and more enjoyable life.

When is ProBalance indicated?

ProBalance has been formulated to assist during life's most common stressful events

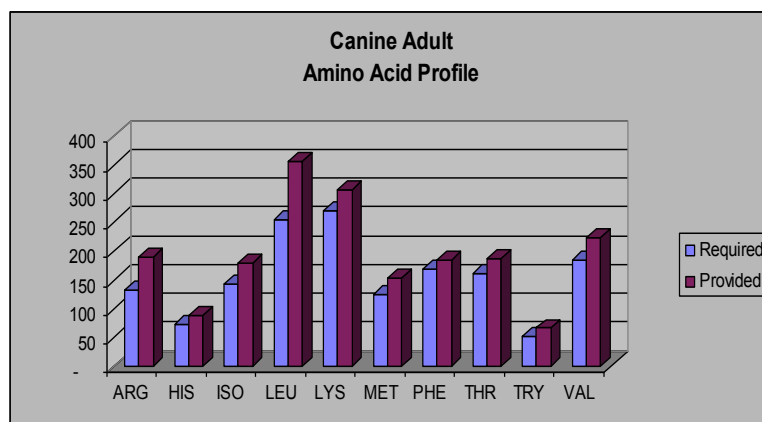

such as weaning, growth, training, performance, hard work, reproduction, lactation, boarding, traveling and when safe, effective weight loss is indicated. In addition, ProBalance over the past 30 years has clinically demonstrated its ability to assist animals during illness, injury, surgical recovery, infectious disease, and chronic debilitating events such as cancer, kidney failure and liver disease.

Why ProBalance Works

ProBalance is able to accomplish all of this as a result of its:

- Concentrated Nutritional Balance
- Unsurpassed Protein Quality
- Enhanced Amino Acid Profiles
- Exclusive use of proprietary and patented ingredients

ProBalance contains multiple high quality protein sources that provide additional Arginine, Taurine, Carnitine and the branch chain amino acids (Isoleucine, Leucine and Valine) to provide an amino acid profile that assists in maintaining optimum health throughout life's many stressful events and to facilitate rapid recovery following illness, injury or disease.

ProBalance provides a balance of all (species specific) Essential Amino Acids

ProBalance Specialty Nutrients

ProBalance contains a highly patented, proprietary glucopolysaccharide immune enhancer (APG 3,6) along with a full compliment of anti-oxidants known to be helpful to an animal's ability to naturally defend itself against disease and reduce cellular damage from excessive free radical oxidation.

ProBalance also has a complete fatty acid profile including high EPA and DHA marine source Omega-3 fatty acids that serve as active modulators of numerous hormones and prostaglandins. In addition, ProBalance provides significant levels of phospholipids, which act as protective barriers for the cells of the body.

For the gastro-intestinal tract, ProBalance contains a proprietary enzyme blend accompanied by both Pre and Probiotics

that help improve nutrient digestion and absorption while reducing the level of unwanted bacterial species that cause discomforting gas, toxins and disease.

ProBalance also contains a proprietary Marine Glycogen Complex that provides natural Cox-2 inhibition along with essential nutrients to help maintain the normal structure and function of healthy joint tissue without any unwanted side effects.

Finally, ProBalance offers the ability to enhance the daily diet of a dog in a highly palatable, easy to use format. ProBalance is a powder that may be sprinkled over kibble, moist foods, raw or home cooked diets, mixed into a dogs drinking water, made into a thick paste for direct application to the palates of recovering animals or be tube fed to chronically sick or debilitated pets.

ProBalance Research

Studies conducted at the College of Veterinary Medicine, Iowa State University have demonstrated that using ProBalance following injury or surgery helps to positively influence nitrogen balance resulting in a decreased rate of skeletal muscle breakdown and weight loss, while providing an increase in both the rate and strength of wound healing.
